

For our established subsidiary in the Netherlands, we are currently looking for a

## Sales and Application Engineer

### Your Main Responsibilities

Following intensive and thorough training at our head office, you will take over responsibility for sales of our instruments for particle size measurement in Belgium and Luxembourg.

You will be accountable for achieving sales targets, establishing and developing business relationships with current and potential customers, providing technical support and advice to customers on product and service selection. Supported by a knowledgeable sales team, application laboratory and instrument specialists, the role includes direct attention to our customers in your sales area.

### Your Qualifications

You have a degree in engineering/science or are educated equivalently with a similar background. A specific training regarding our technology will be provided.

Working from our office in Etten-Leur, Netherlands you will be able and willing to travel nationally and occasionally internationally as the role demands. As a Sales Engineer for Sympatec BeNeLux we expect you to be ambitious, self-motivated and highly organized with a confident, professional approach. The command of the Dutch, English and French language is indispensable for efficient communication with the Sympatec head office in Germany and customers in BeNeLux.

### What we have to offer

We offer a diverse and responsible occupation within a motivated and interdisciplinary team. At Sympatec you will experience an international and yet family-like culture with open-minded, committed and highly qualified colleagues. Our mission, to convince with quality and innovation, creates an attractive and constantly demanding job profile. In addition to an attractive salary plus success-based commission you will also be offered a company car.

If you feel you have the right qualities for a career at Sympatec, please contact us with your application. We guarantee your application to be treated in confidence.

*Sympatec BeNeLux | Etten-Leur, June 2025*

Sympatec GmbH was established in 1984 as a spin-off from the Technical University of Clausthal. For more than 40 years we are pioneering high-tech instruments for particle size and shape analysis, serving a variety of applications in laboratory and process for customers worldwide.

With continuous innovations in laser diffraction, dynamic image analysis, ultrasonic extinction and photon cross-correlation spectroscopy (PCCS), Sympatec makes a prominent contribution to the development, production and quality control of most challenging particulate systems; e.g. in Pharma, Food, Chemicals, Minerals, Powder Metallurgy.

Sympatec is represented in over 70 countries with about 180 employees in 20 offices and with qualified partners. As a technology leader we focus on innovation, quality and premium service. As an independent family-owned business we live up to our social responsibility with regional projects.

Our established office in Etten-Leur, near Breda, is equipped with its own application laboratory and supported by experienced service engineers. It offers existing and potential customers in the Netherlands, Belgium, and Luxembourg professional advice and dependable support.
